

Higher Order Thinking Assignments

* Remember: The first three levels are the foundations for higher order thinking (HOTS) that occurs in the last three levels

Bloom's Revised Levels of Thinking	Possible Products	Your Assignment
Remember	Give a Definition. Make a Fact Chart or Reproduce information in another format. Write Lists.	
Comprehend/Understand	Paraphrase a summary. Describe specific historical events sequentially. Recapitulate a lab experiment in your own words. Explain how you solved a problem.	
Apply	Construct a Model. Conduct Interviews. Give an example of a particular characteristic. Transfer selected information to a new task or a life problem. Use instructions to solve a problem.	
* Analyze	Write a Compare/Contrast Essay. Determine the factors that caused something to happen with evidence and examples. Infer what will happen next in a real or fictional situation showing evidence and examples.	
* Evaluate/ Critique	Argue a position on a controversial issue with evidence and examples. Report on the aspects of a problem and justify a particular solution with evidence.	
* Create/ Design	Create a cartoon that makes a specific point about something you have learned in science. Write a story that generates thought in your audience about something specific in a complex way. Write and produce a play that uses real or fictional historical characters in accurate historical settings.
